“

Welcome to the National Renewable Network! We're thrilled to have you join us in making a significant impact on Australia's environment while saving money. Together, we are pioneering a sustainable future.”

Alan Hunter
CEO and Founder, NRN

About NRN

Over the past few years, NRN has been pioneering a transformative approach that promises to revolutionise the current dynamics of the solar industry in Australia. Our distinctive business model creates a symbiotic relationship between solar and battery installers and energy retailers, redefining the value proposition for every stakeholder involved.

At the National Renewable Network (NRN), we've developed a unique model that combines cutting-edge technology with an innovative approach to energy savings. Our Virtual Power Plant (VPP) integrates homes and businesses equipped with solar panels and battery storage into a cohesive network. This network allows us to stabilise the grid, reduce energy costs, and enhance the use of renewable energy across Australia.

By joining NRN, you're not just a customer, you're part of a larger community working towards a greener future. Our VPP leverages advanced software and algorithms to coordinate energy generation and distribution, ensuring optimal performance and reliability. Additionally, our comprehensive maintenance and monitoring services mean you can enjoy the benefits of renewable energy without worrying about system upkeep.

Let's see how
much **you**
could save.

Meet the Drummonds

East Maitland, NSW

The Simple Energy Bundle helped this household cut their energy costs without the stress of upfront payments, complex finance or long installation delays. Like many Australian families, this home had been struggling with rising electricity bills and wanted a smarter, fairer way to access solar and battery technology.

By switching to the Simple Energy Bundle, they received a solar and battery system installed at no cost and moved onto a smarter energy plan that lets them buy cleaner, cheaper energy generated directly from their own roof.

The result was immediate savings and long-term certainty.

This home reduced their electricity costs by up to

\$978

per year*

Home energy profile

- ✓ Reverse cycle air-con
- ✓ Electric hot water system
- ✓ Family fridge and freezer
- ✓ Clothes dryer
- ✓ 3+ people in the home

The Simple Energy Bundle is designed for

- ✓ Homes with an average electricity usage of 15kWh per day or more
- ✓ Homes with no existing solar and battery system unless the system is older than 10 years or not working
- ✓ Homes with minimal roof shading and suitable space for panels
- ✓ Homes not using life support medical equipment

Before and after they switched

Before
Max and Ella** were paying high grid electricity rates and had no way to control their energy costs.

After
They have the ability to access lower rates without weather dependency and access renewable energy in one simple plan.

Now and Beyond
They have lower bills, greater energy independence and peace of mind knowing their energy future is more stable.

*Actual savings vary based on household usage, location and energy habits. **Names and images do not represent actual customers.
